

Hightech

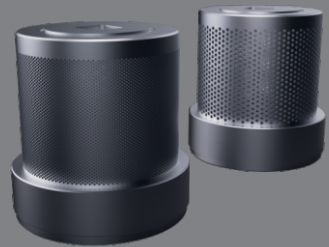

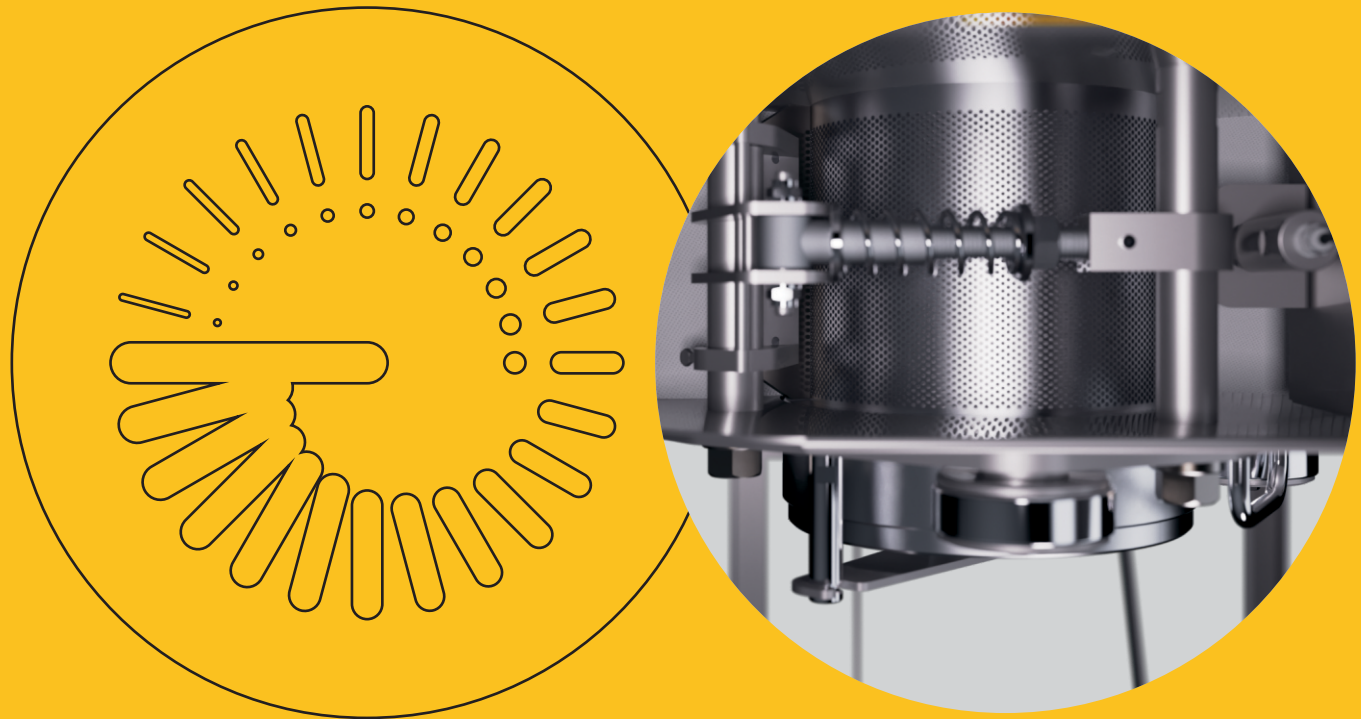

Separator HT BELT

Guaranteed efficiency and quality, machines built to last.
We are committed to the best hygiene and maintenance practices.

High performance without losing quality.

The Hightech Separator HT BELT has pressure control in the separation system using a PLC, enabling setting the desired yield to process various raw materials while maintaining the integrity of the meat fibers, and avoiding any bone particles.

Various separating basket holes

Changeable separator baskets that guarantee the quality of the product with different grain sizes.

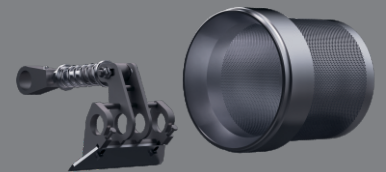

Automatic pressure control with hydraulic system

Hydraulic pressure is adjusted via PLC setpoint to maintain uniform output.

Product level sensor

Prevents the equipment from running empty, increasing the life of the separator belt.

Repair or replacement parts:

- Separator basket
- Scraper

Applications:

Fruit pulp, animal and plant proteins

Separator HT BELT

Model	Capacity (kg/h)	Dimensions (mm)	Power (kW)
HT BELT 250	1200	L:1570 W:1340 H:1320	4,5
